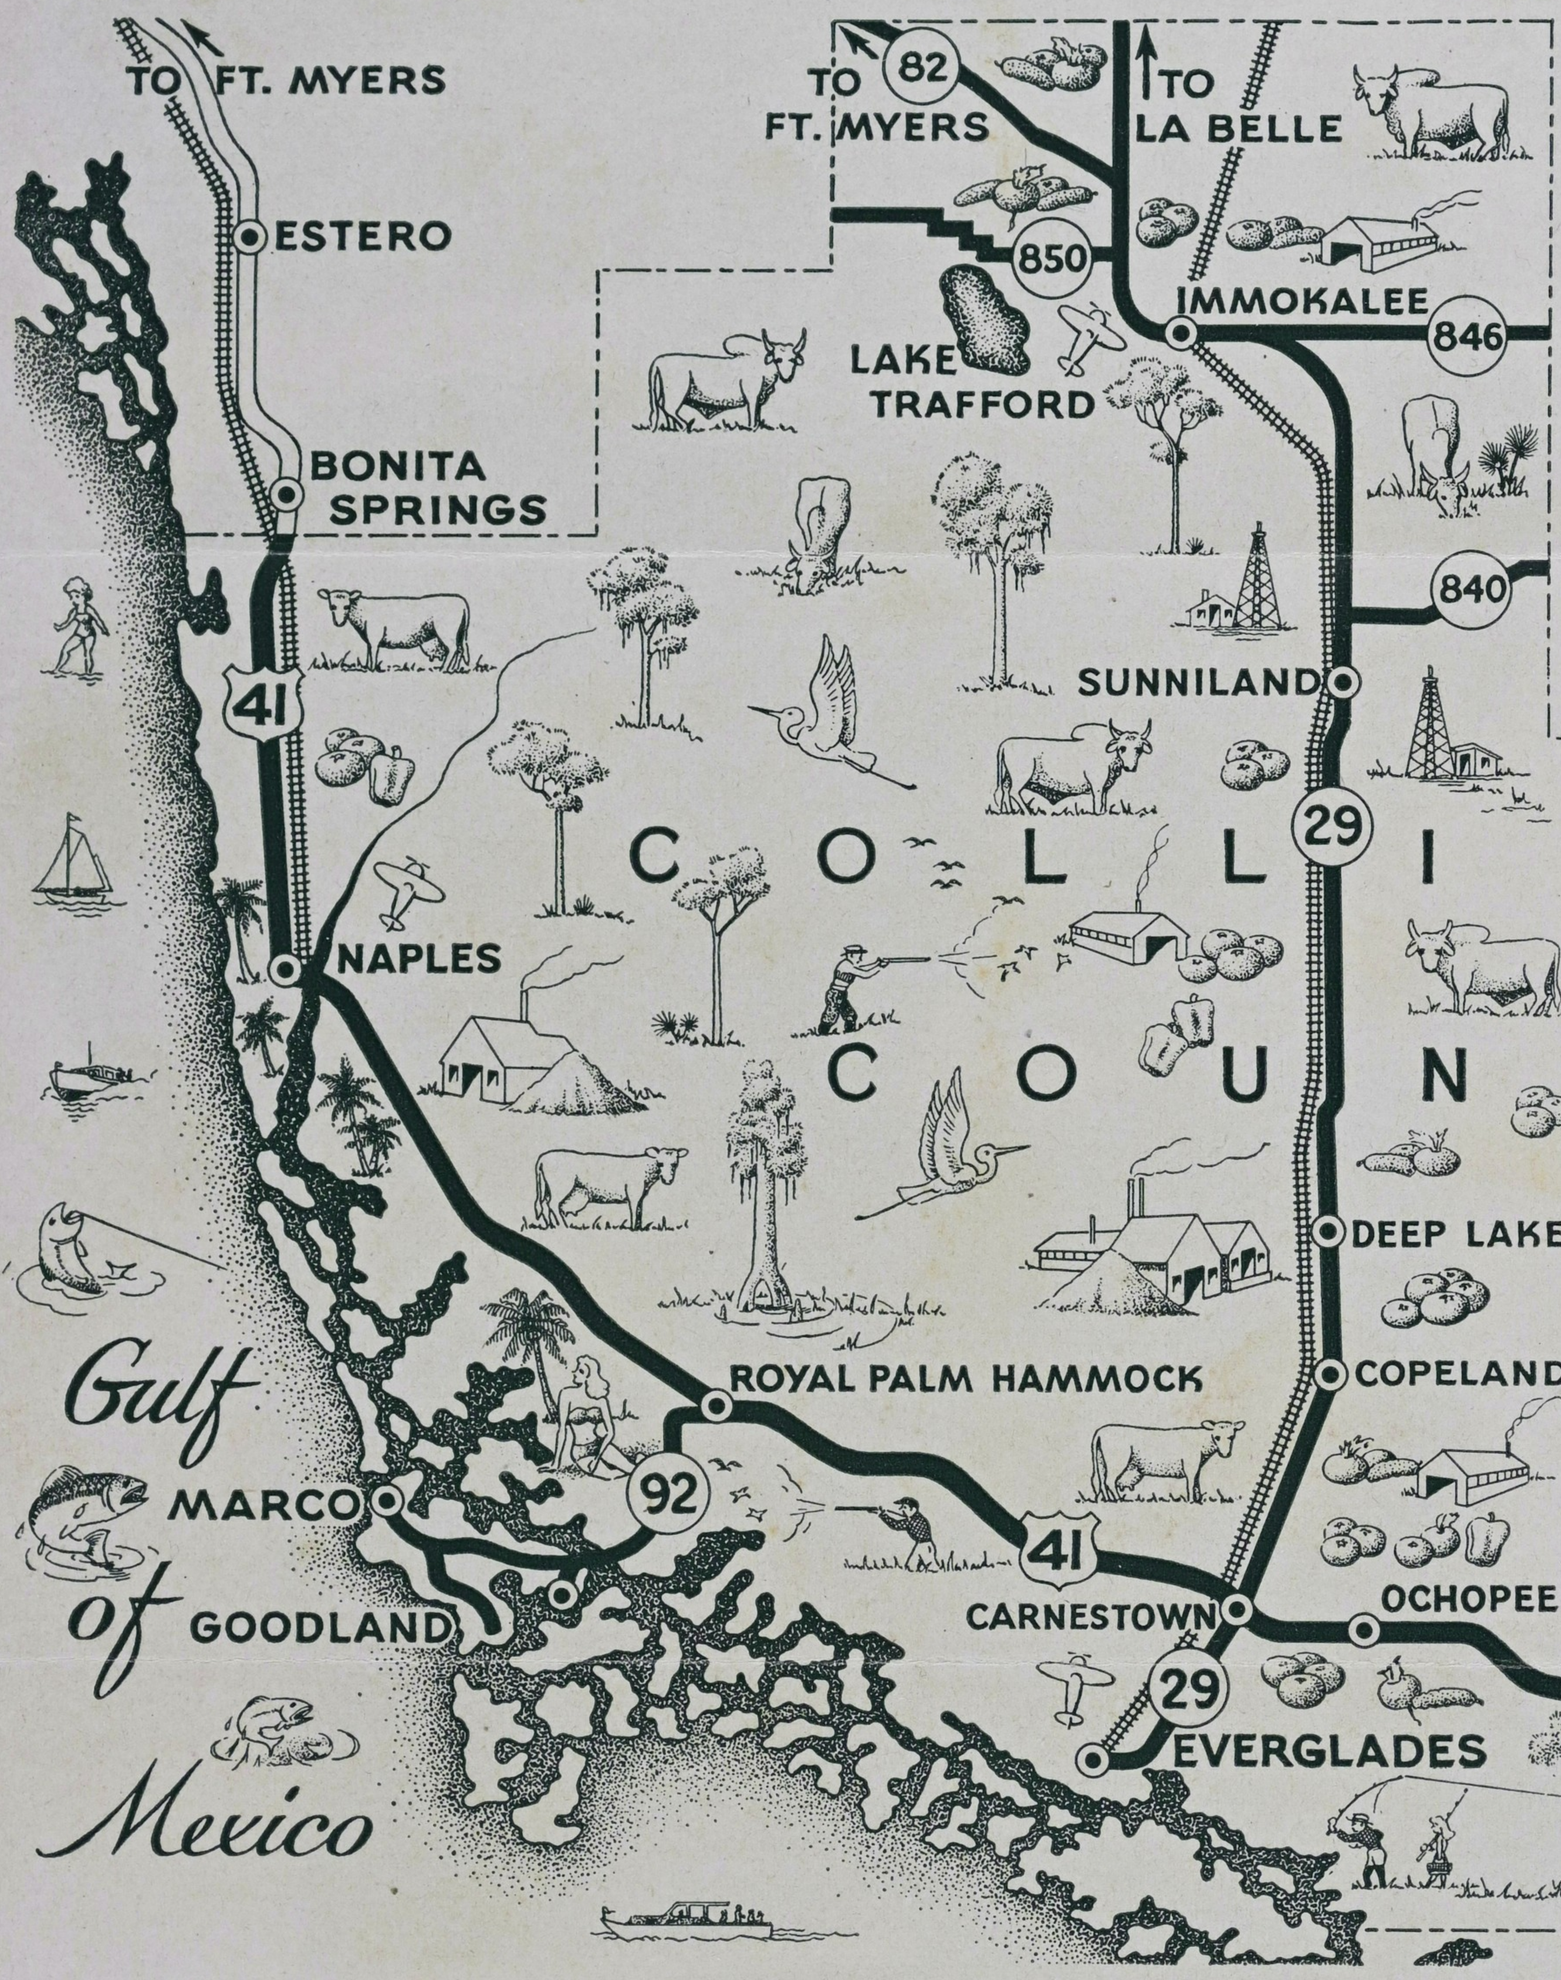
MAP OF

COLLIER COUNTY, FLORIDA



COLLIER COUNTY once was called America's "Last Frontier," but so phenomenally is it being developed and populated that this, Florida's newest agricultural area, is considered one of the most promising in the nation.

Early winter vegetable farms, cattle ranches with improved pasture grasses, logging and timber manufacture, as well as the State's first producing oil field, all are contributing to a rapid growth that spells "Opportunity."

Fish in Sheltered Waters in The Mysterious Everglades

EIGHTY miles due west of Miami, on the Tamiami Trail (U. S. 41), nestled in the last sweeping bend of the deep and sheltered Barron River before it flows into Chokoloskee Bay, stands the Town of Everglades, southernmost incorporated community on the West Coast. To the eastward stretches the vast marsh and prairie country of the Everglades, "River of Grass." Southward there is the tropical paradise of the National Park, one of the truly natural park areas remaining in Eastern America. Largely uncharted, this country teems with wildlife, is peopled by Seminole Indians, once formidable warriors but now colorful and aloof. Wisely chosen as the site for the dedication by President Truman of the Everglades National Park, the Town of Everglades is indeed on our nation's last frontier.
